AgServe.com announces Agriculture Outlook Summit in St. Louis, Missouri

St. Louis, MO, January 9, 2017 – AgServe.com announced a new Agriculture Outlook Summit to be held at the Sheraton Westport Plaza Hotel in St. Louis on March 9, 2017.

Sam Funk, Ph.D., CEO and Executive Economist for AgServe cited the unique benefits of the AgServe Agriculture Outlook Summit.

“This is the only in-person ag outlook in the St. Louis area now,” Funk said. “With an outlook through 2018 highlighting factors to watch along the way – we will deliver timely information with a long shelf-life.”

With nationally known speakers that have headlined major outlook events and been in the middle of relevant action, AgServe is bringing a leading event to the heart of Midwest agriculture.

“With Dr. Scott Brown we have an authority on meat, poultry, and dairy on the day’s program,” said Funk. “Dr. Paul Kindinger is uniquely qualified as a former USDA Director of Public Affairs and Special Advisor to a past U.S. Secretary of Agriculture to provide insights on the regulatory and administrative climate of the new Trump Administration.”

Dr. Funk and Mr. Dan Manternach will present oilseed and grains outlooks respectively. These two former colleagues will also explore South America’s changing agriculture, inflation, interest rates, and FOREX volatility.

This event is geared for those who will benefit from insights and projections of U.S. and global crop, livestock, and poultry production and markets.
